

You & Me

Wild Orchid

You know I love you, baby
You know I love you, boy Now that we've traveled through mountains
Now that we swam through the sea
I'm sure we can go just a little bit further
As long as there's still you and me Ahead I can see a few showers
Maybe we'll weather a storm
It's my turn to watch as you sleep by the meadow
I'll keep us both safe from all harm Just as long as I know that you're here with me
We can crumble the mountains, divide the sea
If we try then we can, if we stick to the plan
Of L O V E as long as there's still you and me
You and me You know I love you, baby
You know I love you, boy Now that we've traveled through mountains
Now that we swam through the sea
I'm sure we can go just a little bit further
As long as there's still you and me Side by side, hand in hand we'll keep moving
Temptation might call out my name
And you'll be the first to say go ahead and answer
And I'll be the first one to say Just as long as I know that you're here with me
We can crumble the mountains, divide the sea
If we try then we can, if we stick to the plan
Of L O V E as long as there's still you and me Now that we've traveled through mountains
Now that we swam through the sea
I'm sure we can go just a little bit further
As long as there's still you and me The magic that's found in dreams
Is the music you put in me
We'll build castles up in the sky
That's the power of you and I As long as there's still you and I
As long as there's still you and me You know I love you, baby
You know I love you, boy Now that we've traveled through mountains
Now that we swam through the sea
I'm sure we can go just a little bit further
As long as there's still you and me Now that we've traveled through mountains
Now that we swam through the sea
I'm sure we can go just a little bit further
As long as there's still you and me You know I love you, baby
