

Air (Hellberg's Back to Summer Mix)

Hellberg, Teqq & Taylr Renee

Now that I have you standing here
I must confess my sin I've always loved you,
Ever since the day we shared
The same air
I've always loved you,
Ever since the day we shared
The same air Right there, in front of you
I've been right there, waiting on you
To see the signs
And recognize
What the rest of your life looks like
Looks like I've exposed, laid out my secret
My heart doesn't stand a chance I've always loved you,
Ever since the day we shared
The same air
I've always loved you,
Ever since the day we shared
The same air Right there, in front of you
I've been right there, waiting on you
To see the signs
And recognize
What the rest of your life looks like
Looks like What the rest of your life looks like Right there, in front of you
I've been right there, waiting on you
To see the signs
And recognize
What the rest of your life looks like What the rest of your life looks like
