Make Them Gold

CHVRCHES

Can you tell me what to have
And what to hold
If you never take the way
On your ownNo one tells us what is hard
And what is fair
We will deliver once we know
Where to fallWe are made up of our mistakes
We are falling but not alone
We will take the best parts of ourselves
And make them goldWe are made of the smallest stars
We are breathing and letting go
We will take the best parts of ourselves
And make them goldCan you steady all the hands
That you hold
If you never look away
From the drumIf you push yourself then I
Will pull you up
And we will deliver once we know
Where to fallWe are made up of our mistakes
We are falling but not alone
We will take the best parts of ourselves
And make them goldWe are made of the smallest stars
We are breathing and letting go
We will take the best parts of ourselves
And make them goldI will wait to see if you come at all
To stop us falling out of phase
Let's see if we can keep
Track of losing daysYou'd smile so wide i can see the stars
To stop us falling out of phase
I will be with you in the fray
With those second thoughtsYou asked for all you asked forWe are made up of our mistakes
We are falling but not alone
We will take the best parts of ourselves
And make them goldWe are made of the smallest stars
We are breathing and letting go
We will take the best parts of ourselves
And make them goldAnd make them gold
