

# We All Fall Down

Clint Black

Mountain high, valley low  
Up and down is the way to go  
Kicking back, standing tall  
Cadillac till you lose it all  
There ain't no lifetime guarantee  
What you get is what you see  
It's all the same for you and me  
We all fall down every now and then  
On a easy street when you lose your feet  
Nowhere to land but the bitter end  
But we all fall down no matter how high we've been  
But the way you fall will have a lot to say  
About the way you get back up again  
And I said if you get, if you get back up again

Take a tumble, head in a cloud  
Mums the word for crying out loud  
Humble pie from high on the hog  
A free ride to a dog-eat-dog  
No matter how high you might be  
Every branch on the family tree  
Is still gonna feel a little gravity y'all you know  
We all fall down every now and then  
On a easy street when you lose your feet  
Nowhere to land but the bitter end  
But we all fall down no matter how high we've been  
But the way you fall will have a lot to say  
About the way you get back up again  
And I said if you get, if you get back up again  
And I said if you get, if you get back up again
