

Party on the Moon

Vanessa Hudgens

[Repeat: x4]
Is anybody out there Oh
So crazy
Martians invading
We're on the moon whoa whoa
It's so astrologic
Meteor shopping
Whoa yeah It's like a rocket rocket
You can't stop it stop it
Once we blast off
It's like a lunar mission
This isn't science fiction
Leave your troubles on earth take my hand
We're ready to stand [Chorus]
We're defying gravity
Somewhere in the galaxy
There's a party on the moon
And your invited
Bring you friends too
It's so exciting
We're defying gravity
Somewhere in the galaxy
There's a party on the moon
And your invited
Bring you friends too
It's so exciting
Yeah yeah
Party on the moon Is anybody out there
Is anybody out there Oh
Star chasing
Masters evading
We're on the moon whoa whoa
I see milky way hotties
So beam me up Scotty
Whoa yeah It's like a rocket rocket
You can't stop it stop it
Once we blast off
It's like a lunar mission
This isn't science fiction

Leave your troubles on earth take my hand
We're ready to stand[Chorus]Intergalactic

Whoa

And time is elastic

Everyone knows it

You hear all the static

Leave your troubles on earth take my hand

We're gonna escape[Chorus]Yeah yeah yeah

Party on the moonIs anybody out there
