

# Under Your Halo

## Chiodos

Lonely bird, sing me your song  
I'll stay awake until I see the sunrise  
I hear your voice and I know you're alright  
I can't wait to feel each inch of you tonight And all I can do now  
It's way to ease the ground I feel invincible, so chemical around you  
Flying high, I'm so alive beside you  
All the stars above are under your halo  
I'll take every breath and never lie about you  
Everything, fuck the world without you  
Pull me higher up, just like an angel  
I'm under your halo Lonely bird, lend me your ear  
I should have never let my eyes blink that night  
Drawn that on the small of your back  
Kissed your forehead cause I didn't want to wake you for goodbye And all I can do now  
It's way to ease the ground I feel invincible, so chemical around you  
Flying high, I'm so alive beside you  
All the stars above are under your halo  
I'll take every breath and never lie about you  
Everything, fuck the world without you  
Pull me higher up, just like an angel Halo, halo [x2]  
Holding up the stars, holding up the stars with your halo, halo  
Lighting up my skies, lighting up my skies with your halo I feel invincible, so chemical around you  
Flying high, I'm so alive beside you  
All the stars above are under your halo  
I'll take every breath and never lie about you  
Everything, fuck the world without you  
Pull me higher up, just like an angel  
Just like an angel, I'm under your halo
