## Bad Religion

Economy, technology, doesn't really work  
Can't try runnin' for government, I'm not a jerk  
I've tried to see these faces all around the way  
You're lucky if they listen to a single word you say  
What is right and what is wrong, the government decides  
You don't have no rights at all, as long as you don't fight  
We're all being oppressed by the upper middle class  
The government you vote for is the one that you put there  
I've put down enough dues, I'm due and so are you  
Residents fear the president, I'm not the government  
We ignore the masses of the whole entire race  
Men in suits are all they knew, without a happy face  
Economy, technology, doesn't really work  
Can't try runnin' for government, just another jerk  
I've tried to see these faces all around the way  
You're lucky if they listen to a single word you say
