## **Nekronauts**

## **Nekromantix**

dead, numb and blind travelling with no purpose, longing for the outside through a black hole mind can't wait to leave dead tissue and head for that bright light bitter, cold as ice shapeless floating on and on, never seen the sunlight don't expect they sympathize in a never ending battle, for a seat on the next flight watching everything from 6 feet over ground while the world is going down we're the nekronauts - explorer of the underworld the nekronauts - dark flower unfurl the nekronauts - explorer of the underworld we're the nekronauts - dark flower unfurl no signs of life but an army of darkness in a war they can't win aim, point and fire but there is no target in a universe of nothing, no watching everything from 6 feet over ground... we're the nekronauts...
