

Wait for the Sun

August Moon

I've spent my, whole life with
Dreams that always go unanswered
I never, expected
To have found what I have wanted
Someone to, hold on to
The patience of forever's promise
So now I, I found the
Reason for the path I've gone

Chorus:

And just as the Moon, waits for the sun, every night
I'll wait by your side, for the rest of my life, the rest of my life
And just like the stars, bright up the sky, every night
I'll light up your eyes, for the rest of my life, the rest of my life
I'm yours

I'll make sure, you never
Fall so fast that I can't catch you
But if I fall, don't catch me
I'll fall in love with you much further
And now I, I'm begging
Time to move a little slower
Cuz now I, I need the
Time to fulfill every promise

Chorus

I'm yours to be the wings that fly you
Yours to piece together every stone, I'll build you a throne
Turn my heart into your home
Yours to be the wind that lifts you
Higher than the clouds that cover the sun
I'll be the one that fuels the fire to your soul

Chorus
