

They Will Know Another

Thy Art Is Murder

From the filth and the dirt
And the overflowing septic tank within the earth
A sea of shame floods us with terror
Swallows the earth into hell
Forever
Old world don't look away
I want you to watch out children die
Torch the dirt, scorch the flesh, burnt to ash
Peel away the skin and grind their bones into a dust
Part the seas, shift the trees, move their sacred stones
Raise their towers, fall into the fire
Feed them fear, keep them locked up in their homes
Turn one man against another
Take the sword unto his brother
Feed them pain
Make them sick against their will
There's always more blood to spill
One more child that we couldn't save
Just another life smothered
We thought that we could take away the pain
But they will know another
I'm not afraid to die I'm afraid I'll survive
and have to watch you suffer (x2)
Fuck
Old world don't look away
I want you to watch our children die
One more child that we couldn't save
Just another life smothered
We thought that we could take away the pain
But they will know another
(x2) I'm not afraid to die I'm afraid I'll survive
and have to watch you suffer
Watch you suffer
I'm not afraid to die I'm afraid I'll survive
and have to watch you suffer
Forever
