

# Blood

## Editors

This wicked city  
Just drags you down  
You're with the red lights  
Your side of town Don't say it's easy  
To follow a process  
There's nothing harder  
Than keeping a promise Blood runs through your veins  
That's where our similarity ends  
Blood runs through our veins There's nothing believable  
In being honest  
So cover your lies up  
With another promise Blood runs through your veins  
That's where our similarity ends  
Blood runs through our veins, ah Blood runs through your veins  
That's where our similarity ends  
Blood runs through our veins Blood runs through your veins  
That's where our similarity ends  
Blood runs through our veins, ah If there's hope in your heart  
It would flow to every part  
If there's hope in your heart
