

# Make For This City

James

Stand at the curbside and watch the world go by  
In this town no one looks you in the eye  
Where is the place not driven on by time?  
Where's the city of dreams, a city made of light?  
Where people laugh more than cry  
Leave their doors open  
Fall in love everyday  
Brave hearts get broken  
This city aims to love regardless of the bruise  
We love and marry any sex or race we choose  
Make for this city  
Make for this city  
On the underground, we all look so worn down  
On the circle line forever going 'round  
We love our children, not school down, open minds  
We learn that happiness is the aim of life  
Make for this city  
Within our minds  
Make for this city  
City of light within our minds  
Where's the connection to the heart of living?  
Where's the connection to life?  
The life we are living is unforgiving  
Less like a flower than a knife  
Where's the connection to heart living?  
Where's the flower of life?  
We aren't defined by our work and what we own  
If you can find your way here, you've made it home  
We love and marry any sex or race we choose  
There's no one here who use their gods to exclude  
Make for this city  
Make for this city  
Make for this city  
Make for this city  
Make for this city  
Make for this city
