

# Shots Fired

## Breathe Carolina

Don't apologize if you can't look me in my eyes  
It kills me, now I don't know you  
I don't owe you, take the money and go  
Leave my heart broke, you could have had everything I own  
You've got so lost, I don't get it  
Where you get off leaving me all alone? You said some things that you can't take back  
I know where it's going when you look like that  
You can see what you started and you still want more  
You shouldn't want a war Shots fired, shots fired, I know  
Shots fired, words start flying, real love  
Words start flying, real love  
Shots fired, shots fired, I know  
Shots fired, words start flying, real love  
Words start flying, real love Everyone you love, in a week I watched you give em up  
I guess I should have seen it coming  
Never thought you'd pull the trigger on me  
And days after you left  
No one could tell me where you went  
You turned your back like a coward  
In the end you were never a friend If you walk out now then you can't come back  
I know where it's going when you look like that  
You can see what you started and you still want more  
You shouldn't want a war Shots fired, shots fired, I know  
Shots fired, words start flying, real love  
Words start flying, real love  
Shots fired, shots fired, I know  
Shots fired, words start flying, real love  
Words start flying, real love And now that everything's undone  
Go and tell yourself you've won  
Or hate the way you've become  
You're talking like a loaded gun  
Aiming it at everyone  
Just take the money and run Shots fired, shots fired, I know  
Shots fired, words start flying, real love  
Words start flying, real love  
Shots fired, shots fired, I know  
Shots fired, words start flying, real love  
Words start flying, real love
