God Created Woman

Prince

(with wynonna)
(lisa webb/bruce burch/franny romeo)It was a man's world for a day and a half
Adam had a garden for a bachelor pad
But something was missing in his paradise
Then along came eve, the apple of his eye
Without hesitation he gave into temptation
cause God created woman to raise a little cain
Gave her a softer side, put fire into her eyes to drive a man insane
He knew what he was doing, cause history has proven
Since God created woman man's never been the same
Old christopher columbus would have never set sail
Without a little push from isabel
Alexander graham invented the phone
So his wife could ring a bell when she wanted his home
Some feminine persistence can make a world of difference
cause God created woman to raise a little cain
Gave her a softer side, put fire into her eyes to drive a man insane
He knew what he was doing, cause history has proven
Since God created woman man's never been the same
It's all a part of the plan, for the good of every man
cause God created woman to raise a little cain
Gave her a softer side, put fire into her eyes to drive a man insane
He knew what he was doing, cause history has proven
Since God created woman man's never been the same
