This Is Us

Keyshia Cole

I'm like a Sunday morning, you're like Friday night
And when we kiss it's the perfect weekend, no rain in sight
And when I'm feelin' incomplete, you're my missing piece
And when you need your breath taken away I'll be your thiefFrom the start to the end we don't need to pretend
That we're perfect all the time
'Cause we know what we have through the good and the bad
It's the strength that you can't denyI don't need to find a million reasons why
This is us, this is us and this is how we love
Some ways we're different but together we're so right
This is us, this is us and this is how we love, oh yeahAnd even if we fall apart we'll never feel alone
Just like the moon starts risin' our hearts bring us home
We can always find each other like the northern star
Doesn't matter where we are our love can't go that farFrom the start to the end we don't need to pretend
That we're perfect all the time
'Cause we know what we have, through the good and the bad
It's the strength that you can't denyI don't need to find a million reasons why
This is us, this is us and this is how we love
Some ways we're different but together we're so right
This is us, this is us and that's the way we loveWe don't always see eye to eye
You might see a million colors, I just see it black and white
Ain't no way we could get much higher
'Cause when we touch it feels like fire
We both know how good this feelsYes, we do baby because
This is you, this is me, this is usI don't need to find a million reasons why
This is us, this is us and this is how we love
Some ways we're different but together we're so right
This is us, this is us and this is how we loveBaby this is how we love
This is how we love, yeah
This is how we love, yeah
This is how we love, yeah
