

# See My Side

[Jordin Sparks](#)

I've been trying for days to think of a way  
To find the words to make sense of how we behave  
This might take a while, so please just hear me out You know how things can get crazy when we go ablaze  
We just get carried away, believe me, I know  
Don't even say a word, now please just hear me out See my side and I'll see yours better  
Love me back and I'll love you better Sometimes the stunts that we pull don't even make sense  
But I was never the one to feel that resent  
This ain't 'bout who's to blame, so please just hear me out When the scene gets intense, it's hard to prevent  
From going all crazy again, believe me, I know  
Don't even say a word, now please just hear me out See my side and I'll see yours better  
Love me back and I'll love you better  
See my side and I'll see yours better  
Love me back and I'll love you better We'll get right back  
On the right track  
We'll get right back on  
We'll get right back on  
On the right track See my side and I'll see yours better  
Love me back and I'll love you better  
See my side and I'll see yours better  
Love me back and I'll love you better
