Higher

Mark Rosas

Swimming in your sea, caught my eye
I don't want to chase you all night
I want to make you feel more than alright
Baby please stop the make believe
'Cause I don't want to wait to stay the night
Staring at your face, you stare at mine
I want to make you feel more than alive
Let it be, levitate with me

Baby please!
I just want to take you higher (higher)
Come on let me light your fire (fire)
Oooooooh
I just want to take you higher (higher)
When you get close to me (close to me)
There's no gravity

I just want to take you higher

Mi-mi-mi-mi-mi-mi-mister
I just want to take you
Higher

Girl you do not know how much I think about you
You got me floating and I'm flying baby what should I do?
I've been searching all my life for a love that's true
You may be the one but it takes two

Swimming in your sea, caught my eye
I don't want to chase you all night
I want to make you feel more than alright
Baby please stop the make believe
'Cause I don't want to wait to stay the night
Staring at your face, you stare at mine
I want to make you feel more than alive
Let it be, levitate with me

Baby please!
I just want to take you higher (higher)
Come on let me light your fire (fire)

Oooooooh
I just want to take you higher (higher)
When you get close to me (close to me)
There's no gravity

I just want to take you higher [2x]
