# Morning Sky

## Blue Dogs

You and I were lovers all along
We had a good thing going strong
And never doubted
Lately, I feel changes comin' on
I know that I will soon be gone
And you don't even want to talk about itOh, and it makes me stop and wonder why
People give their hearts and turn
Around and say goodbye
If there's something on your mind
You better say it while there's time
'Cause I'm leavin' when I see that morning skyOh, how did we ever come to this?
There's nothing for me in your kisses anymore
Late nights in the kitchen
I'm pretending I still care
But we both know there's nothing there
And you just keep on starin' at the doorOh, and it makes me stop and wonder why
People give their hearts and turn
Around and say goodbye
If there's something on your mind
You better say it while there's time
'Cause I'm leavin' when I see that morning skyOh, and it makes me stop and wonder why
People give their hearts and turn
Around and say goodbye
If there's something on your mind
You better say it while there's time
'Cause I'm leavin' when I see that morning skyYou and I were lovers all along
We had a good thing going strong
And never doubted
Lately, I feel changes comin' on
I know that I will soon be gone
And you don't even want to talk about itOh, and it makes me stop and wonder why
People give their hearts and turn
Around and say goodbye
If there's something on your mind
You better say it while there's time
'Cause I'm leavin' when I see that morning sky
See that morning sky
