We're Living In Our Own Time

Earth, Wind & Fire

I feel it in the night, I hear a whisper
A ray of light, a flash across the sky
Through the window in my eyes
A bolt of thunder exploding in my mindIs it real, what I feel
It's just like floating away
While the moon floods the room
I can hear music start to playI see it on your face
Oh, what a difference lovin' can make
Silence of the dark, words are falling from my heart
It's all around us my thoughts are callingImagination is born when love's alive
A spirit creating a place for you and I
Together let's ride away to find the universe
And let our dreams live our livesLiving in our own time
You are the answer
Loving on our own time
We found the answer
Hiding in the midnightNow I'm so willing to discover
Believing forever touching each other
Nothing out there can stop us tonight
All that we're feeling so right you mean so much to meI feel so wanted but still so free
The warmth of your embrace
I know time will not erase
Making it easy to go lovingYou are the answer
Loving on our own time
We found the answer
Hiding in the midnight
