# Radiant Strain

## Scar Symmetry

Inexplicably altered continuum, strange activity
Magnetic fields of fractured aeons fall exponentiallyAll life modifiedUnseen light from deep within it's felt
Come undone or prosper, time will tellUndone, now see the light hail from a different sun
Waveforms increase as to light up the mindNow begin to cave in, the stellar movement of the stars
Caving in to begin this fate affecting human lifeInsight comes aliveDeep inside the mind and heart it's held
Unbegun we face a rising plagueUndone, now see the light hail from a different sun
Waveforms increase as to light up the mindNow begin to cave in, the stellar movement of the stars
Caving in to begin this fate affecting human life
Radiating light
The polar shift is here
Radiant strain arise
To matter, space and timeCome undone, will it all be gone
Something rose from the undertow
2012, now we all see what it holds
A void allowing a world to seep throughUndone, now see the light hail from a different sun
Waveforms increase as to light up the mindNow begin to cave in, the stellar movement of the stars
Caving in to begin this fate affecting human life
Radiating light
From which there's no escape
Radiant strain arise
Illuminate the mind
