

Unchained

Iron Savior

A new day is born
In peace and in silence
Rays of the sun
Rip through the clouds
A new age is to comeThe darkness decays
The heavens are shining
Golden and blue enlightening the dawn
A New World will move onSo many lives
Out in the fields oh so many have died
Now we will rise
The chains that have held us are broken
And now we areFree, from the tyrant
The conqueror's been banished
Free, and united
The throne in the sky now is
Free, free from the tyrant
Relentless we fought to be
Free, free and united
We have outlasted the war
The shadows of warThey came from the stars
To search a forgotten land
Rescue they brought
With thunder they fought
The tide has turned as the appearedSo many tears
Oh, we will always remember the years
Earth has been burned
But then they returned
To save us and now we areFree, from the tyrantNo more we'll fight
Return to the light
The conqueror's been banished
The savior has vanished
The mighty machine
A million life's dream
Outlasted the past
Out in the vastFree, from the tyrantAfter the war
The world is unchained
Freedom we've gained
The Savior's been banished
The fortress has vanished

In peace and in silence
The world will move on
Darkness and war
No more we'll fight
We have returned, returned to the light
