

# The Only Medicine

## Scary Kids Scaring Kids

I wash it down  
Just to block out all the sound  
I never thought I'd be alone  
Well, look at me now Sleepless nights, painful goodbyes  
Who the hell was I kidding? The room starts to spin  
All alone and bleeding once again  
Can you help me make this  
Make this fucking end? Oh my God there must be something  
Something to take the pain away  
Well, so there's nothing you can give me  
Well, it's probably better off that way Just forget  
All I ever wanted was to forget Bloodshot eyes and a starless sky  
Who the hell are we kidding? You look so content  
I guess the bright side  
Hasn't found me yet  
Pull me up so I can catch my breath Oh my God there must be something  
Something to take the pain away  
Well, so there's nothing you can give me  
Well, it's probably better off that way I live my life in the shadows  
Of the things I try to hide Oh my God there must be something  
Something to take the pain away  
Well, so there's nothing you can give me  
It's probably better off that way
