

# James Bond Theme (Moby's re-version)

## Moby

Now let it lift you, oh One love will, one love will  
One love can take you make you feel alive and whole Why give it up? Why tear it up? One love will, my love will  
My love will make you feel alive enough to let go Oh, the death row  
Once again you feel like the brothers know  
Once again, back is the incredible  
The rhyme animal, the unforgettable D Public enemy number one  
Five-oh said, "Freeze" and I got numb  
Can't I tell 'em that I really never had a gun  
But the wax that the terminator X spun now So soft, so alive  
My dear, so good  
So close, so real This love  
Woah love, wanna give it up  
Let's turn it loose Bond, James Bond
