

# Cold and Empty

**Kid Rock**

Maybe I've been on the road too long  
Livin' my life through these songs  
I guess lovin' a music man really wasn't in your plans  
Does it matter if I'm sorry again and why should I apologize? You knew all along this was my life  
You know my ins and outs  
All my fears and doubts, it's the life I love  
But it's you I can't live without And this whole world seems cold and empty  
Someone please turn on the lights  
Lord if there's an Angel, You could send me  
I could use one here tonight Now where am I supposed to go?  
My only home was in your soul  
I know that I can't stay here and drown in a pool of tears  
Should I pack my pride and face this life alone And this whole world seems cold and empty  
Someone please turn on the lights  
Lord if there's an angel, You could send me  
I sure could use one tonight Maybe it's me whose cold and empty  
And in my darkness I can't see the light  
Please God if there's an angel, You could send me  
'Cause there's one missin' from my life You are my heart, you are my soul  
Wherever you are, that where I go  
You know my ins and outs all of my fears and doubts  
It's the life I love but it's you I can't live without Yes it's the life I love  
But it's you I can't live without  
The life I love, the life I love  
But it's you I can't live without
