

# Run

Ben Kweller

Over hills, over dams  
I'll run with you  
If it works, if it fails  
I'll run with you Since fifteen I have ran  
Everywhere you can run  
But together is much better  
So let's run, let's run, let's run Empty hands, tired feet  
I'll run with you  
On the sand over concrete  
I'll run with you Since fifteen I have ran  
Everywhere you can run  
But with you it's much more fun  
So let's run, let's run, let's run It doesn't matter that they say we'll never make it  
It's so strong that nothing could ever break it  
You and I can tackle anything of any size All anyone could ever want is a co-pilot  
Someone to leave this town and up and start a secret  
And when you sneak out at night, I'll kiss you right between your eyes Over hills, over dams  
I'll run with you  
Down the mountain through the trails  
I'll run with you Since I was fifteen I have ran  
Everywhere you can run  
I'm not done with my traveling  
So let's run, let's run, let's run I'm not done with my traveling  
So let's run, let's run, let's run  
I'm not done with my traveling  
So let's run, let's run, let's run
