

Tomorrow

Jai Waetford

You know it's hard to be your friend
I hate to let you down again
We don't know how it's gonna end
Now you know the secrets I can never mend
Cause this could be gone
When we wake up tomorrow
Hearts off our chains
Time that is left is borrowed
Cause I can't take the way that you look at me
Is there any place you and I could be?
we could go away
it all could go away
this silence is deafening
this ocean is without an end
and there's something
to know- something I know-
that we were meant to be
please listen to me
I should listen
cause this could be gone
When we Wake up tomorrow
hearts off are chains
time that is left is borrowed
and I can't take the way that you look at me
is there any place you and I could be?
we could go away
it all could go away
tomorrow..
tomorrow...cause this could be gone
when we wake up tomorrow
hearts off our chains
time that is left is borrowed
and I can't take the way that you look at me
is there any place you and I could be?
we could go away
it all could go away
