Automatic

Sasha

Another dawn another day I long to waste
I like the comfort of the chaos in my place
I put my mind on hold my conscience on standby for a little whileAnother promise to my room I couldn't keep
Another night just full of television sleep
And all my books are getting on the shelfI liven up for giving in
I'm never cold but shivering
The more I learn the less I know
Gotta dig myself out of this hole 'causeSometimes I feel so automatic
In this automatic world
I can't escape my automatic
This automatic worldNow and then I realize a trail of fear
Every time my resolutions disappear
But then again I'm slipping back into releaseI liven up for giving in
I'm never cold but shivering
The more I learn the less I know
Gotta dig myself out of this hole 'causeSometimes I feel so automatic
In this automatic world
I can't escape my automatic
This automatic worldI'm sick of it all just rising to fall
I'm hiding to seek I'm a freak what a freak
Though it's only on my mind
Until now I failed to find the way of controlSometimes I feel so automatic
In this automatic world
I can't escape my automatic
This automatic worldSometimes I feel so automatic
In this automatic world
I can't escape my automatic
This automatic world
