Surround U

Fantasia

You don't even know how much I love you
You don't even know that I adore you
I bet it would astound you if I told you now to
Just let all my love surround uAnd every time you call me I start shaking
And me not telling you 'bout my heart aching
I bet it would astound you if I told you now that
I wanna let all my love surround u, ladies and gentlemenIf you knew what I thought about you, it's like the best thing I could find
Treat like honeydew, when I'm kissing you, I can't lie
And we're suppose to be just friends, benefits with no commitments
But I find myself missing you more than I should beI got a picture of you, I keep it with me
You never knew that it was so deep
Sick over you, ain't that the truth
And it ain't hard to tellYou don't even know how much I love you
You don't even know that I adore you
I bet it would astound you if I told you now to
Just let all my love surround uAnd every time you call me I start shaking
And me not telling you 'bout my heart aching
I bet it would astound you if I told you now that
I wanna let all my love surround u, ladies and gentlemenCan't believe you don't know about me, even talk about you in my sleep
All my family knows, straight over dose, I'm you, you, you
Go in my room, and I shut the door
So I can think about your smile some more
Made you out to be the biggest thing to me, locked up in lifeGot a picture of you, I keep it with me
You never knew that it was so deep
Sick over you, ain't that the truth
And it ain't hard to tellYou don't even know how much I love you
You don't even know that I adore you
I bet it would astound you if I told you now to
Just let all my love surround uAnd every time you call me I start shaking
And me not telling you 'bout my heart aching
I bet it would astound you if I told you now that
I wanna let all my love surround u, ladies and gentlemenI'm sitting here in your truck, going crazy over your touch
And it gets to be to much
(On the daily, if I could keep you with me)
Just a little bit of your time, wanna give you all of mine
I'm thinking maybe, baby, we should just, baby, we should just tryYou don't even know how much I love you

You don't even know that I adore you
I bet it would astound you if I told you now to
Just let all my love surround uAnd every time you call me I start shaking
And me not telling you 'bout my heart aching
I bet it would astound you if I told you now that
I wanna let all my love surround u, ladies and gentlemenYou don't even know how much I love you
You don't even know that I adore you
I bet it would astound you if I told you now to
Just let all my love surround uAnd every time you call me I start shaking
And me not telling you 'bout my heart aching
I bet it would astound you if I told you now that
I wanna let all my love surround u
