Set It Off

Did you think that I
Did you think that I
Would fall down flat on my face?
Did your smug remarks
Ever reach the heart?
Pretentious, poised in place
OMG, Look at me
All I wanna be is just like him
Filthy mean, Filthy Scene
Slowly spiraling down into the drain
2 sleepless weeks is all that it takes to find
Foundations worth the time of our life
This is our night,
This is our time
This is our chance of feeling alive
Because chaotic minds can think alike
This is our night,
This is our time
This is our chance of feeling alive
Cause everyone knows the stars come out at night
Oh dear, have we struck a nerve here?
Altered your perception
Seeds of doubt have manifested into our investment
Lay away while you pray that we'll go away
We will find you
Like a ghost, here's a toast to eternity
We are here to stay
2 sleepless weeks is all that it takes to find
Foundations worth the time of our life
This is our night,
This is our time
This is our chance of feeling alive
Because chaotic minds can think alike.
This is our night,
This is our time
This is our chance of feeling alive
Cause everyone knows the stars, the stars come out at night
(They come out at night) [x3]
5 soldiers in line with
our blindfolds in hand
Our spirit intact we abide by the land
5 captains on deck with a look in their eyes
Their ship may be broken but look at them fly
Fixation with passion will push you to move
The obstacle mentioned is referring to you
You should know we're never ever ever gonna quit
This is our night,
This is our time
This is our chance of feeling alive

Because chaotic minds can think alike. This is our night,
This is our time
This is our chance of feeling alive
Cause everyone knows the stars come out at night
