

# Your Signs

## Wipe Away

Gotta make the list of what is best  
gotta make the fist and beat against  
have to leave an impression  
do you have a suggestion?  
i'm all out of good ideas  
the ones you have always put into your ears  
with all you care to share  
how did i end up here?  
your signs are pointing to nowhere  
that's exactly where i won't go  
your signs are pointing to nowhere  
and no one that i know  
will ask all you care to show me  
care to show me  
gotta make the list of what is best  
gotta make the fist and beat against  
have to make this perfectly clear  
i'm not waiting for one million years  
for us in general  
you make the chemical  
situation i put us in  
unfamiliar in foreign land

your signs are pointing to nowhere  
that's exactly where i won't go  
your signs are pointed to nowhere  
and no one that i know  
will ask all you care to show me  
how would you like me  
where would you like me to be  
and could you make me worry  
just a little more  
the way you look at me confuses me  
even with you next to me  
your signs are pointed to nowhere  
that's exactly where i won't go  
your signs are pointing to nowhere  
and no one that i know  
will ask all that you care to show me

your signs  
your signs (care to show me)  
your signs  
care to show me  
care to show me  
i won't go
