All Things Go

Lowkitorex

it started off with a rhyme and a dream
made it the greatest and the latest
now we fresh on the scene
got the sample for the kids
wont you ever grow up
went to drexel and had classes
but i never showed up
i was writin all day til my hands would hurt
professor didnt appreciate it, called me a jerk
new boy need to learn but i never would
pay attention in schools somethin that i never could
and no other beat gotta be steamin
and we can work wonders over logic and reason
he on the hype
now they call it a buzz
and how we get the party poppin, baltimore club
myspace came the replay next
and you gotta have Xaph for the DJ set
no matter how they could play us
they could never replace us
and any way u slice it homie they cant take us
u came to take us
all things go, all things go
to recreate us
(hey yo Xaphoon we back son, we did it)
all things go, all things go
we had our mind set
all things go, all things go
you had to find it
all things go, all things
say hello to the game
the people know my name
and do they really love us
or is this just a fling

and we be Peter Parker in love with the Mary Jane
so many people gone
so many people came and
its that brand new, spontaneous

dope flow, intravaneous
miscillaneous, grinding
better late than never
im callin it perfect timing
but we gon have a little bit of fun
cuz when its all done
you throw yo sneaks up and call it a good run
i admit, that i would never wrap up then burn me
i dont kno where im headed
but i kno its a journey
and my bags is packed
so can u hand me my intinerary
i give attention like a soldier in the military
this is what you gotta notice today
we promise to make sure they never throw us away
u came to take us
all things go, all things go
to recreate us
all things go, all things go
we had our mind set
all things go, all things go
you had to find it
all things go, all things
u came to take us
all things go, all things go
to recreate us
all things go, all things go
we had our mind set
all things go, all things go
you had to find it
all things go, all things
