Finally

Yes

Finally, we put it to the test
Dedicate to the true believer in you
Finally, put it to the test
Finally
Make no mistake to the mainstream
Music be the master planner
Just like the books you read
You'll hear it on your radio scanner
It's not so much what you know
Or who you know that's coming
It's what you do regardless
It's what you do eventually
Finally, we put it to the test
Dedicate to the true believer in you
Finally, put it to the test
Finally
I've seen them running, down and out
Never mind the good intentions
A dreamer with a reason to live
Is as clear as his next invention
You take a second look to find
A second chance at giving
The voices say do not despair
There's a real good reason you're living
I could feel the earth moving
I could see sky falling
We can chase the storm

We can sing the rain
Walk the final distance
Live this life again
Finally, we put it to the test
Dedicate to the true believer in you
Finally, put it to the test telling me to let go
I can feel the earth moving
(I can sing the rain)
I can feel the rain coming
(Live this life again)
I can feel the storm

I can sing the rain
I can free my heart
Live this life again
You can choose to stand
You can choose to fall
You can see the rain
You can have it all
I can feel the rain coming
I can feel the earth moving
I can feel the love coming
I can feel the earth moving
I can feel the rain coming
I can feel the love coming
I can feel the earth moving
