Lost In You

FM Static

You light up my sky just like a firefly
Your words are more than just a passing breath
I wanna feel alive, I need you in my life
You're like a photograph, never changingI've seen you many places and I still feel the same
Your love's electric, I can feel it when you touch me
No one but you can make me feel like I wanna change
I got this feeling that today's gonna be a good dayI just want to get lost in you again
And I just want to get lost in youAnd we laugh and we turn
And we live and we learn and we fight because we care
And we lose and we love
And we push and we shove until there's nothing left to loseYou light up my sky just like a firefly
Your words are more than just a passing breath
I wanna feel alive, I need you in my life
You're like a photograph, never changingI've seen you many places and I still feel the same
Your love's electric, I can feel it when you touch me
No one but you can make me feel like I wanna change
I got this feeling that today's gonna be a good dayI just want to get lost in you again
And I just want to get lost in youAnd we laugh and we turn
And we live and we learn and we fight because we care
And we lose and we love
And we push and we shove until there is nothing left to loseI've seen you many places and I still feel the same
Your love's electric, I can feel it when you touch me
No one but you can make me feel like I wanna change
I got this feeling that today's gonna be a good dayI just want to get lost in you again
And I just want to get lost in youAnd we laugh and we turn
And we live and we learn and we fight because we care
And we lose and we love
And we push and we shove until there is nothing left to loseYou light up my sky just like a firefly
Your words are more than just a passing breath
I wanna feel alive, I need you in my life
You're like a photograph, never changingAnd I just want to get lost in you again
And I just want to get lost in you
