When You Were Young

Flickerstick

You finally fade away
Your face it fades of grace
You know the war I rage
But you take the holy way
I took away from you
The queens you never drew
The heart you hold's a waste
The words that make you say
Hey, where ya going
Whatcha doing
You're leaving...
When you were young
You fell right into love
When you were young
And no one stopped you
When you were young
You fell right into love
When you were young
And no one stopped you
You finally fade away
Your face it fades of grace
You fought the war I waged
Correct and stolen hate
I'll take away from you
The things you never knew
The heart you hold's a waste
Her words don't mean a thing
Hey, where ya going
Whatcha doing

You're leaving
When you were young
You fell right into love
When you were young
And no one stopped you
When you were young
You fell right into love
When you were young
And no one stopped you

(I will...I will stop you)
When you were young
You fell right into love
When you were young
And no one stopped you
When you were young
You fell right into love
When you were young
And no one stopped you
Oh, when you were young
You fell right into love
When you were young
And no one stopped you
Oh, when you were young
You fell right into love
When you were young
And no one stopped you
