Mind Control

Primal Fear

Crash into the universe
All on hold, far into the night
We start to break in cyberspace
All on board, no place to hideA mission to nowhere
A place beyond belief
We see the sunrise
From a different sideThere were many years to come
So many heads will roll
The final curtain falls
It's mind control, mind controlUnrelated borders
Death comes close, before we realized
There were no more warnings
Lightning flashing without compromiseA mission to nowhere
A place beyond belief
Heroes die young
But we're aliveThere were many years to come
So many heads will roll
The final curtain falls
It's mind controlFighting only for one reason
The adventure in our eyes
I want to believe
It's mind control, mind controlThere were many years to come
So many heads will roll
The final curtain falls
It's mind controlFighting only for one reason
The adventure in our eyes
I want to believe
It's mind control, mind control, mind control
