

# Mystery

**Brooke Fraser**

I wanna get your words stuck in my head

I wanna touch your soul with mine

I want to always be, be by your lead

Always

I wanna know that you hung the stars in the sky

So on lonely nights I would know your presence

I wanna feel your love under my skin, down through my bones

[Chorus] Your love endures forever

Your love changes me

Your love makes me whole, makes me better

Your love endures

I wanna feel the wind and know that you're near me

And see in the seasons your mystery

I wanna feel your love flow through my veins

Pound through my heart

[Chorus] I want to know how this could be

Yet your love remains a mystery

That's woven all the way

That's woven all the way

That's woven all the way through me

[Chorus]
