Keep the Fires Burning

Incognito

We got to keep the fires
We got to keep the fires burningWhen you find you're all alone
And the walls come closing in
No place to run and no one there to turn to
Now your options' running thinDon't be afraid to step into the darkness
Reach out for the flame within
From ancient times a lesson given to you
Never give up until you win, heyWe got to keep the fires burning
A flame so bright to show the way
We got to keep the fires burning
That leads us to a better day, yeahLook to the light, children of the future
We'll guide you through the stormy sea
But keep an eye, for hiding in the shadows
Are those who stopped you being free, yeahWe got to keep the fires burning
A flame so bright to show the way
We got to keep the fires burning
That leads us to a better dayWe got to keep the fires burning
A flame so bright to show the way
We got to keep the fires burning
That leads us to a better dayWe got to keep the fires burning
A flame so bright to show the way
We got to keep the fires burning
That leads us to a better dayWe got to keep the fires burning
A flame so bright to show the way
We got to keep the fires burning
That leads us to a better dayWe got to keep the fires burning
A flame so bright to show the way
We got to keep the fires burning
That leads us to a better dayWe got to keep the fires burning
A flame so bright to show the way
