

Troubled By the Way We Came Together

[Natalie Imbruglia](#)

From hand to hand you bought and sold
Blood is the shield against the weather
Became a stone for fear of being melted
Troubled from the day we came together When you recover from yesterdays low
True slave to traction of pleasure
I collect the embers as I watch you grow
You left along the way we came together As you breathe, as you breathe into life
You will lead, you will lead
As you stray, as you stray far from home
I will believe, I will believe Flames of love immerse you
Cradle and coerce you
Shadows over on the place you play Names of love we mind along the way
Seem shallowed by the way we came together
My heart carries on but my head knows better
Troubled by the way we came together As you breathe, as you breathe into life
You will lead, you will lead
As you stray, as you stray far from home
I will believe, I will believe 'Cause you are here today and gone tomorrow
Basking in the fields of never never
You wanted today but I wanted forever
Troubled by the way we came together My heart carries on
But my head knows better
Troubled by the way we came together As you breathe, as you breathe into life
You will lead, you will lead
As you stray, as you stray far from home
I will believe, I will believe 'Cause you are here today and gone tomorrow
