Empty Shell

Dysangelium

All that is left is an empty shell
Of my heart that is crushed
I don't never wanna see
What my mind has seen when you loved me
Every night
Every night alone with you
Every night alone now
When she sits on your lap try to pretend to laugh
When she does stupid things just like I used to do
Do not hate her, don't you even try
For to leave her is to love her the same as you and I
I, I love you
And I miss you too
I really do love you
And I really miss you too
But I don't know you
And I don't need you
And I don't want you anymore
Every night
Every night alone with you
Every night alone now
