

One Step Ahead (feat. Harold Butler)

Beres Hammond

One step ahead and you're up
One step behind and you're down, you're down
You've got to be where that spotlight is shining
One step ahead and you're up One step behind and you're down
you're down
You've got to be where that spotlight is shining, shining
One day you won't hear a sound and there'll be no one around, around
once there was never that spotlight on you
shining shining shining shining on you
One step ahead and you're up (tell it tell it to the world now) One step behind and you're down
You've got to be where that spotlight,
You've gotta be, I said you've gotta be where it's shining (interlude)
One day you won't hear a sound once there was never that spotlight shining
WOh ohoh Lord You know in these times
when the world is full of nothing but wars and lies
and crimes and and hatred and modernization becomes the mother of civilization Nations turning against nations
We need to stop, look around
because there is a light, light enough
a light to keep nations together as one And if we are one step ahead then we know we are up
And if we are one step behind we know we're down
So you see we've got to be rocking, rocking, rocking
One step ahead and you're up One step behind and you're down
You've got to be where that spotlight (music fades)
