

Tin Star Man

Thunderstone

Land of the free
Home of the brave
A history of heroes
In my name
One truth under god
I feel I am stranded
In a world covered in dark
A shield against evil
I light the spark
I can feel it in my blood
I carry on my sacred ride
Across the seas and the great divide I will save you, even if you don't want me to
My electric eye will always find you
I'm the one, me, myself and I
Feel the thunder when I light up the sky No one can stop me now
It's already begun
I'm the tin star man It's a thin line between good and bad
But knowing I'm right keeps me on the track
Righteous and clean
I have the power, I have the force
To bring down my foes and to lead my cause
The light shines on me
