

Burning Sky

[illegible]

Baby behave, we'll make it work
You're only what you give back
You're only what you give back
You're only what you give back
You're only what you give back
You're only what you give back
Stop this right away
Put that down and clean this mess up
End of conversation
Put your back in it and make it up to me now
Stop this right away
Put that down and clean this mess up
End of conversation
Put your back in it and make it up to me now
Are you with me? Are you with me?
You're only what you give back
You're only what you give back
You're only what you give back
You're only what you give back
You're only what you give back
