

True Self

Deosil

Honor - Choices that you make, reflect of whom you truly are

Courage - Rise above the masses, live your life complete and strong

Compassion - Is the power that must be used for the good of all

Loyal - To the ones in my care, standing true for what the cause
My soul has been searching, longing for something

I see my true self and I have learned well
Honesty - There are no shades of grey, only truth as it can be

Sincere - Don't need to give my word, to speak of such, is the same thing

Courtesy - There's no need to prove strength, even respect your enemies

Values - This is the code I feel, emotions without words, can speak
My soul has been searching, longing for something

I see my true self and I have learned well

My true self
Insight, intelligence, integrity, the honor that is in my soul
