Be Enough

Nonpoint

Who you think you're fooling
Who you think you're dealing with here
Wanna draw a line in the sand
Well you can put it right there
You don't scare me I'll put it in the air
So you can put it in your lungs
And you can smell and be awareYou could build 1000 walls
You can make 1000 calls
To get yourself 1000 men
And put a gun in everyone's handIt won't be enough
It's gonna take you and an army to get me to give this up
Be enough
To get me to tuck tail, turn around and run the other way
That's not gonna be enough
It's gonna take you and an army to get me to give this up
Be enough
To get me to tuck tail turn around and run the other way
That's not gonna be enoughI know you wake up thinking
That you have me all figured out
Well I have a message that I think that I'll deliver now
You made an enemy you never should have made
I'm gonna take you apart and then just call it a daySo go and build 1000 walls
And make yourself 1000 calls
And get yourself 1000 men
And put a gun in everyone's handIt won't be enough
It's gonna take you and an army to get me to give this up
Be enough
To get me to tuck tail, turn around and run the other way
That's not gonna be enough
It's gonna take you and an army to get me to give this up
Be enough
To get me to tuck tail turn around and run the other way
That's not gonna be enough
