

Night School

Rosanne Cash

Morbid like a mystery town
Water, heat and moon
Steam under magnolia trees
Never-ending roads What happened to that other life?
We thought we lived we too
We traveled like spies in paradise
The time, it felt so true (Chorus)
In night school
In night school What about this big old house?
Tell me all the news
What's became of all those years?
Whatever will we do? I'm hoping there's a mystery town
Water, heat and moon
And steam lines over battle fields
And all I see is you In night school
In night school The hungry ghosts still tap the walls
Where once there was a door
I've given everything to them
Still they wanted more Steam lines on the window panes
We acted like such fools
But like in everything to be
Lying in mystery In night school
In night school
