

# Behind the Scenes

Ilse

## BEHIND THE SCENES

The night falls  
On the city walls  
They're closing in  
I'm tired of being on my own

Hotel to hotel  
It's like I'm on the run  
Tonight i come home to your arms

Let go of my cover  
I turn myself in  
Can't wait any longer  
I let you in  
Let go of my cover  
I turn myself in  
Can't hold it any longer

I let you behind the scenes  
While the world sleeps  
And you and me are wide awake  
Give me something I can feel  
Something real  
All I see is you babe

Eyes closed  
Feelings exposed  
I live for your touch  
You hold my heart

Your lips to my ear  
I hear you breathe, You say:  
You belong with me,  
Close to me

Let go of my cover  
I turn myself in  
Can't wait any longer  
I let you in

Let go of my cover  
I turn myself in  
I can't hold it any longer

I let you behind the scenes  
While the world sleeps  
And you and me are wide awake  
You give me something i can feel  
Something real  
All I see is you babe

People are people  
Don't know what they say  
They hide in a closed mind  
They're drifting away

People are people  
Don't know what to choose  
I put you in my spotlight  
All i see is you

I let you behind the scenes  
While the world sleeps  
And you and me are wide awake  
Give me something  
I wanna feel  
All I see is you babe
