

Power of American Natives (Dag & Butcher Mix)

Dance 2 Trance

I believe in the power of American natives
I believe in the power of American natives Untamed people in an untouched land
With pride in their culture and pride in their clan
You know it didn't take long before the world got around
First come first serve just take what you found They fought for their world and they paid with their lives
Stood proud until the end in the face of all those lies
The eagle flies across a blood red sky
Remind you of the past and brings tears to your eyes I believe in the power of American natives
I believe in the power of American natives
