Orange 9mm

Is it wise to touch the fire getting higher?
Is it wise to touch the fire getting higher? Fools don't ever look both ways before they cross the road
Chancing their lives and rolling snake eyes, 'cause that's the way it goes
When they try to tease fate
And ends up late Is it wise to touch the fire getting higher?
Is it wise to touch the fire getting higher? She don't care how or when it's done and you know neither does he
Heat, steam and the moment's king or queen, however the case may be
When they try to tease fate
And ends up late
