

Gob

I want to know the place
Where you come from
I like to see your face
When I wake up I offer me Just for yourself wrapped up
For you and no one else
And no one else could be appreciative
Be as appreciative of your charm When you walk you take you time take the tiniest steps
When I'm at your side if you feel you're left behind
I'll slow down
To your pace and we'll be like a tree and we'll grow on And if the world should end with fire and bombs
I'd like to be there holding hands with you
I'll view the end of the lands
And no one else could steal a piece That big of my heart
I want to be with you and we will be together
I want to be with you and we will live forever
