

# Saturday Nite

## Earth, Wind & Fire

Advisory - the following lyrics contain explicit language:

It was Saturday nite the moon was bright shining  
It was Saturday nite the moon was bright shining down as  
harvest light  
Music all around to hear set the stage an atmosphere  
Many dress to suit their taste participate in the ego race  
Tonight's the night for you to be biggest man in history  
Saturday nite's your curtain call you found your place after all  
I saw a face now in the crowd sayin' nothin' talking loud  
Life is just a day living games we play  
London Bridge is fallin' down do what Simon says  
Doing what you feel games can be unreal  
Humpty Dumpty when you fall there be no one here to call  
Life is still your mystery you see you see you see  
Many friends who gather 'round in hope to feel safe and sound  
We emphasize to make it clear our stumbling nations atmosphere  
While looking through the looking glass our vision show a stormy past  
When you gonna wake an' see the sun you just wasting time and having fun  
Life is just a day daily games you  
play  
London bridge has fallen down you did what Simon said  
Doing what you feel games are so unreal  
Humpty Dumpty why'd you fall you see there's no one here to call  
Now we've solved this mystery you see you see you see  
Doing what you feel be unreal life is just a day  
Life is still a mystery daily games we play  
What you gonna do when the night is blue  
When the cloud is gone and your dream is true
